

M255 Duplication System

Infinite Possibilities...

The M255 Duplication System, which is a revolutionary solution that will allow you to link up to 255 ten target towers for a maximum of 2550 targets simultaneously. Duplication can be made from a single master DVD/CD ROM or Hard Drive. Our professional version comes built in with a 160GB HD and USB 2.0 card. The M255 features advanced functions such as 'DHP technology', which creates a hard drive partition to the size of each master disc image to maximize HDD space, and 'Master Error Proof technology', which allows you to replace a bad master disc and continue at mid burn without ever having to lose your blank disc.

USB 2.0 connection provides you with the option to link to your PC and make one of the CD/DVD-RW drives inside your duplicator tower as an external optical drive. It also features two password protection modes to restrict unauthorized access to your duplicator. Best of all, the auto startup display features can be customized to the function you utilize most, including simple copy, test, verify, and copy & compare modes.

10 Drives X 255 Towers = 2550 CD copies in 3 min.

FEATURES

- Built-in 160GB hard drive
- Dual Password protection modes to prevent unauthorized usage
- DHP "Dynamic" hard drive partition Technology
- Ability to load disc image to HDD and rename the partition
- Support Counter Function
- Master Error Proof
- Auto Start Strategy
- Auto Source Disc Analyzing
- Set Burn Speed
- Select Source Drive
- Audio Track Edit
- Utilities & Tools
- 4 "Eject On Start" modes
- Ability to load disc image to HDD and rename the partition
- Intuitive user-friendly LCD panel
- Flexible Link Mode Selection
- Linked Firmware Upgrade
- Synchronize Firmware
- 1 year warranty (parts & labor)
