

# RipStation 7000 Series

## Professional Grade CD Ripping Systems

### Fast, Reliable, Affordable

The RipStation from MF Digital is the most advanced commercial CD Ripper available. Ideal for large broadcast studios, radio stations looking to "go digital" or service bureaus providing digital music conversion, the RipStation 7600 Series is a perfect solution.

Engineered to perfection the RipStation is designed for long run disc ripping with absolutely no human intervention. Completely automated, the RipStation will extract audio from CDs along with metadata aggregation going down 22 levels to guarantee the most accurate sourcing possible. The "KVM" PC built-in solution means each RipStation System is pre-configured which results in easy setup without error - simply connect Keyboard, Video Monitor and Mouse and begin ripping.

MF Digital offers unique features which other manufacturers do not. From the moment you open the box to the last disc of the day, you can count on RipStation.

### CD Ripping Abilities

<b>Metadata</b>	<b>Accurate &amp; Consistent Music Information</b>
<b>Cover Art</b>	<b>Obtain Highest Resolution Album Artwork</b>
<b>Backup</b>	<b>DVD or Hard Disk Backup Ability</b>

# RipStation 7000 Series

## Best Metadata Available

MF Digital's RipStation offers more versatility and flexibility than any other ripping system. Since metadata is the key to audio management, the RipStation uses licensed, paid-for metadata services. This insures extremely accurate and consistent data for every disc ripped.

## Cover Artwork

Ideal for any music catalog is the album artwork or image of the original CD cover. RipStation delivers high resolution format images for each and every CD. So whether you play it on an iPod or large screen Plasma you have the best resolution available.

## PodLoading In One Step

To streamline the CD ripping process the RipStation offers direct-to-device abilities. All systems will load CD content and metadata directly to the Apple iPod line. In addition, the Pro version includes additional players made from Creative, SanDisk, Nokia, Imerge, XiVA, Crestron, Escient, Request, Digital Future and Sonos.

## Multi-Threading File Mover

Maximum efficiency of CD Ripping can be obtained from our multi-threading technology. Multi-threading means each drive in the RipStation works independently. This enhancement increases overall throughput performance and reduces the amount of time needed to rip a set of CDs.

## The MF Digital Family of CD Ripping System Specifications

### RipStation

### RipStation Pro

<b>Model Number</b>		7602, 7604	7104 Pro
