

Highlights:

Simpana® software delivers mobile access to insights, environmental information and job controls reliably, securely, and cost effectively whether in the field, remote office, or data center.

- 1. Anywhere access** to live job statistics, success/fail info and job load reporting.
- 2. Monitor backup environment** anytime without being in office.
- 3. Enhance responsiveness** for better IT management and the needs of the business.

Simpana® Software Insights and Remote Management from Virtually Anywhere

CommVault® Monitor Mobile App for IT Administrators

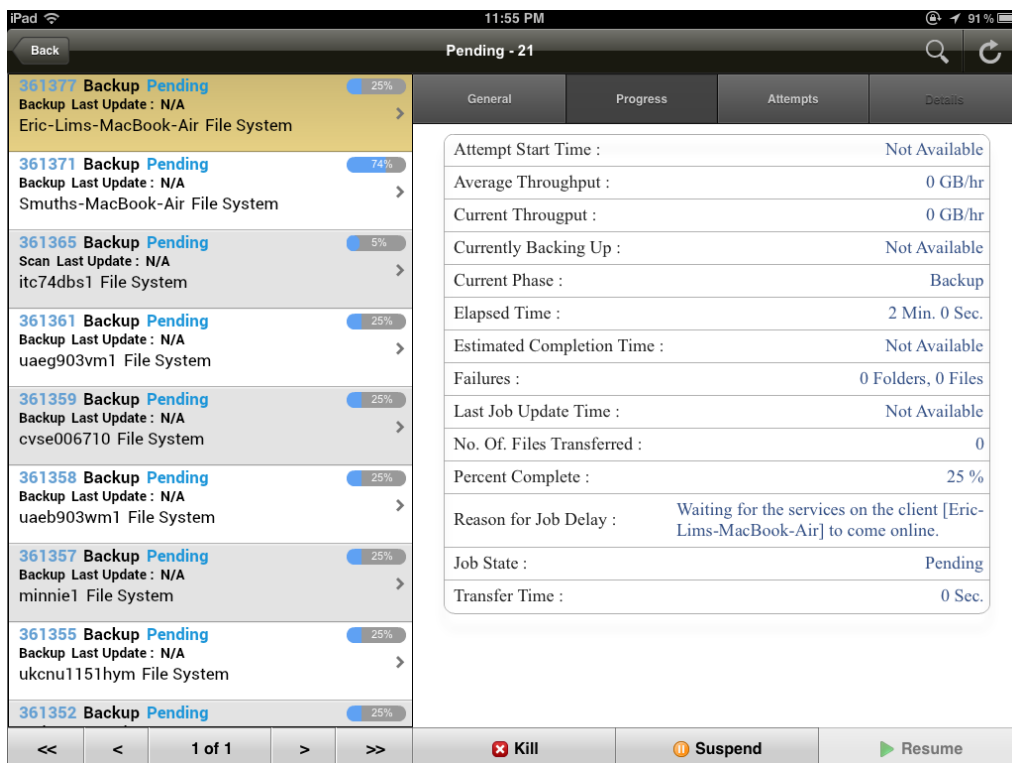

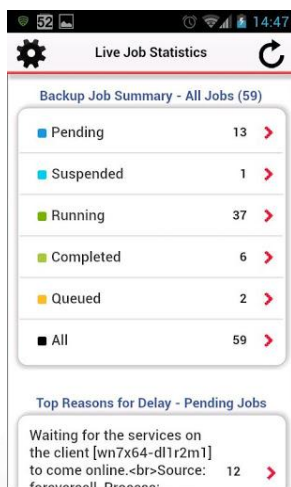

For today's increasingly mobile workforce, retrieving information on the go is essential to aiding better productivity, creativity and satisfaction. IT administrators are just as mobile as the rest of the workforce they support. Being able to deliver access to information and control for key aspects of the Simpana software environment securely can deliver real value to your organization.

CommVault's continued innovation is bringing anytime, anywhere mobile reporting to administrators with the CommVault Monitor app. This app delivers insights into what is happening in the Simpana environment and the ability to manage data protection operations from virtually anywhere.

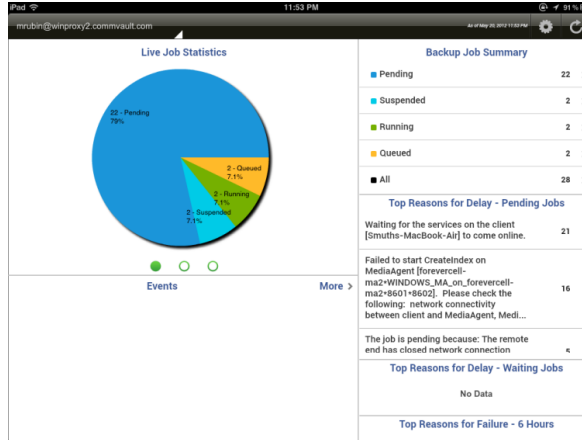

With the CommVault Monitor app, the backup administrator can take immediate action as alerts and e-mail notifications are received, and proactively monitor progress during critical backup windows. The app provides a view of all active jobs in the job controller with the ability to view, suspend, kill and resume jobs without requiring access to the full CommCell® Console. It is free to Simpana software users, downloadable in app stores and available for:

- Android smartphones and tablets
- iOS smartphones and tablets
- BlackBerry tablets

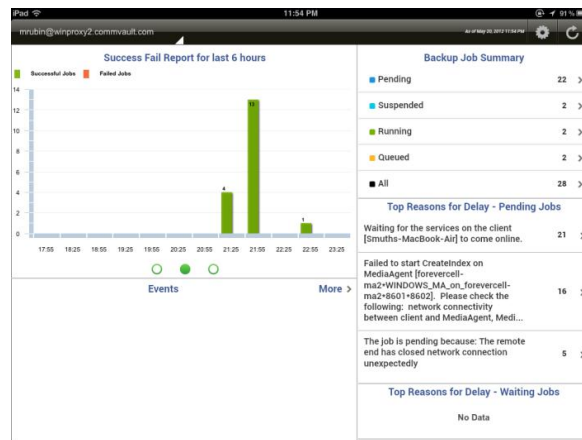

Our Solving Forward® philosophy is meeting the demands of an increasingly mobile enterprise by helping mid-sized and large enterprises increase efficiency and productivity and reduce risk in the face of emerging trends like the consumerization of IT and the proliferation of mobile and personal devices in the workplace.
